

Exemptions to the "Age 60 Rule" should be granted immediately. The rule (14 CFR 121.383) instituted in a fraudulent and deceitful manner,(as illustrated in the Petition for Exemption) is doing great harm to a large number of qualified, experienced pilots. The rule is kept in place to the benefit of those pilots fortunate enough to have had lengthy careers at the six or seven major airlines that have lucrative defined benefit retirement programs. I am a pilot for one of those airlines. I have over 25,000 hours of worldwide experience, and have only seen an increase in safety as pilots grow in age and experience. Exemptions must be granted now, while waiting for this rule to be abolished.
